1. NATURE OF OPERATIONS AND GOING CONCERN

Latin Metals Inc. (the "Company") was incorporated under the laws of the Province of British Columbia, Canada on January 9, 2006. The Company's principal business activity is the acquisition, exploration and evaluation of mineral properties located in South America. The Company operates with a Prospect Generator model focusing on the acquisition of prospective exploration properties at a low cost, completing initial evaluation through cost-effective exploration to establish drill targets, and ultimately securing joint venture partners to fund drilling and advanced exploration. Shareholders are exposed to the upside of a significant discovery without the dilution associated with funding the highest-risk drill-based exploration. The Company common shares trade on the TSX Venture Exchange ("TSX-V") under the symbol "LMS".

The head office and principal address of the Company is Suite 890 – 999 West Hastings Street, Vancouver, BC, V6C 2W2, Canada. The registered and records offices of the Company are located at Suite 1170 – 1040 West Georgia Street, Vancouver, BC, V6E 4H1, Canada.

As at April 30, 2021, the Company has working capital of \$538,895 (October 31, 2020 –\$737,323) and an accumulated deficit of \$9,786,341 (October 31, 2020 - \$9,694,921).

The Company is in the process of exploring and developing its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production or proceeds from the disposition thereof.

These condensed consolidated interim financial statements have been prepared under the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have financial resources to sustain operations in the long term. There is no assurance that future financings will be available on favourable terms. An inability to raise additional financing may impact the future assessment of the Company as a going concern. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

These condensed consolidated interim financial statements do not reflect the adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

Title to Mineral Property Interests

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. Property title may be subject to unregistered prior agreements or transfer and may be affected by undetected defects.

8. FINANCIAL RISK MANAGEMENT AND MANAGEMENT OF CAPITAL

Fair value

The fair values of the Company's receivables, net of input tax credits, and accounts payable and accrued liabilities approximate their carrying amounts due to their short-term nature.

Fair value hierarchy

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities which include cash and cash equivalents;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's cash and cash equivalents have been fair valued using Level 1 of the fair value hierarchy.

Financial risk management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents, and receivables. Cash and cash equivalents are maintained with financial institutions of reputable credit and are redeemable on demand.

The carrying amount of the receivables, represents the maximum credit exposure.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company is engaged in ongoing evaluation of opportunities to improve its financial position which includes, but is not limited to, additional equity financings, obtaining exploration partners and/or the sale of assets. At April 30, 2021, the Company has working capital of \$538,894 (October 31, 2020 – \$737,323). 8. FINANCIAL RISK MANAGEMENT AND MANAGEMENT OF CAPITAL (Cont'd...)

Financial risk management (Cont'd...)

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has no outstanding debt subject to variable interest. Accordingly, the Company does not believe it is exposed to significant interest rate risk on its cash balances which are held in accounts subject to variable rates.

Foreign exchange risk

The Company is exposed to foreign currency risk to the extent that monetary financial instruments are denominated in United States, Argentinean and Peruvian currencies. The Company's operating expenses are incurred primarily in Canadian dollars; its exploration programs are primarily in Argentina and are denominated in either United States dollars or Argentine pesos. The fluctuation of the Canadian dollar will, consequently, have an impact upon the reported profit or loss of the Company and may also affect the value of the Company's assets and liabilities. The Company continuously monitors this exposure to determine if any mitigation strategies become necessary.

Price risk

The Company is exposed to price risk with respect to commodity prices, particularly those included in its exploration and evaluation asset portfolio. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Management of capital

The Company's objectives in managing its capital (items included in shareholders' equity) are to fund acquisition, exploration and development of its exploration and evaluation assets and to meet its administrative and corporate activities to ensure that the Company continues as a going concern.

The Company is an exploration stage company and is currently unable to self-finance its operations. The Company has historically relied on equity financings to raise sufficient funds to carry out its exploration and acquisition activities and pay its administrative costs. Therefore, the Company intends to raise additional funds as required to carry out its planned activities.

The Company manages the capital structure and makes appropriate adjustments to it based upon changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt and acquire or dispose of assets. In order to manage its capital requirements management has put into place a planning and budgeting process.

The Company is not subject to any externally imposed capital requirements or restrictions, and there were no changes to the Company's approach to managing capital during the three and six months ended April 30, 2021 and 2020.
